

Name: _____

Class Expectations
8th Grade Math
Manchester Essex Regional Middle School
Mrs. Manzi ☺

Units:

*Rational Numbers and Percents

*Simple and Multi-Step Equations

*Expressions and Functions

*Linear Functions and Scatter Plots

*Systems of Equations

*Triangles and Transformations

*Angles and Shapes

*Exponents and Scientific Notation

Rules: Please use these rules as a guideline for conduct in our Zoom classroom.

1. Respect your fellow classmates, your teacher, your school and yourself.
2. Work hard to learn the material. This includes being attentive in class, asking questions when you are confused, studying each night and attending extra help when needed.
3. Come prepared. Bring all of your materials (notebook, writing utensils, planner, and homework).
4. Stay organized. Take neat notes, record your homework daily and keep your binder up-to-date.

Organization/ Notebooks(5%): This year, we will be learning many mathematical concepts that build on one another. Therefore, organization of each unit's material is a **key component** to success. Notebooks will be checked periodically and you will be graded on it.

Homework (15%): Must be on time and complete to earn full credit. Many homework assignments will be on IXL or a problem set. Homework that does not meet those standards will earn a 50%. Late assignments after one day are not accepted and will earn a 0. Copying someone else's work is considered cheating. Cheating is not tolerated and both students will receive a 0.

*It is the student's responsibility to get the notes and to check Google Classroom for assignments and Problem of the Days when absent.

Classwork/Participation (15%): Come to each class with an eager and open mind, ready to participate in going over previous assignments as well as learning the day's material. Ask relevant questions, offer solutions and be an active learner. Problem of the Days on Google Classroom will also be factored into your participation grade.

Name: _____

Tests/Projects (40%) and Quizzes (25%): Assessments will make up the majority of your grade. Expect a short quiz after a couple of sections and a test or project after each unit.

Consequences: If you do not comply with the expectations above or are disrupting class in any way, you will face the consequences prescribed by the school's disciplinary procedure. No student will be allowed to disrupt his or her classmates' education.

We are in for an exciting year of math!
