

TECHNOLOGY

Mrs. Jenna Seymour is the MMES Technology Teacher. The Technology Program at Memorial Elementary utilizes 21st century skills to promote learning through technology. The goal of our program is to help our students become critical thinkers, effective problem solvers and creative collaborators. Through the use of technology in the technology lab and its integration throughout the school, our students have access to technology in all parts of their curriculum throughout any day. Mrs. Seymour is in the MMES Schoolhouse three days a week.. Two days a week Mrs. Seymour teaches Technology at Essex Elementary School.

Our technology curriculum includes:

- Learning about Digital Citizenship
- Computer Coding and Robotics
- Google Apps for Education: Google Classroom, Docs, Sheets, Slides
- Utilizing various multimedia production tools: Kidpix, Neighborhood Map Machine, Graph Club
- Gaming to promote learning: Math Blasters, Digital Passport, Cross Country USA
- Integrating multimedia apps into curriculum learning: Book Creator Coding Journals, American President Chatterpix, Author Study Morfos, American Revolution Green Screens.

VISUAL ARTS www.memorialschoolart.weebly.com yutkinsc@mersd.org

Mrs. Claudette Yutkins is the MMES Visual Arts Teacher for students in Pre-K to 5th grade. Her goal is to continue students' natural curiosity, expressiveness, and joy of creating while creatively instilling a life-long passion for learning both locally and globally. Students acquire age-appropriate skills in drawing, painting, printing, sculpture, etc. through the use of different media and through the basic elements of art and principles of design. Collaboration is a large part of the art curriculum with the classroom teachers as well as with the local museums. Each year a district-wide elementary art show takes place in the spring to celebrate the students' yearlong accomplishments.

WELLNESS

Mr. Luke Boria is the MMES Wellness Teacher. His goal for the Wellness class is to educate all students and instill a passion for life-long learning and fitness. Students will take part in a variety of different team and individual fitness activities, as well as be challenged in their psychomotor, affective and cognitive domains. Students will be introduced to many fine and gross motor skills to help provide a base knowledge of a wide variety of activities, games, exercises and movements. The major goal here at Memorial is to keep students excited about their overall wellness and challenge them to seek different outlets within the community.
